

Java

```
class Solution {  
    public int partitionString(String s) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} s  
 * @return {number}  
 */  
var partitionString = function(s) {  
  
};
```

C++

```
class Solution {  
public:  
    int partitionString(string s) {  
  
    }  
};
```
